Gurunavi tokyo restaurant guide

Planning to come to Japan soon? How to prepare and get all the information before heading to Japan? Guide? Traveling is very exciting and exhausting sometimes with all sorts of things you need to prepare, such as looking for reasonable budget accommodation, transportation in Japan, weather forecast, restaurant search, money exchange shops and attractive tourist destinations. However, some people do not have time to prepare in advance. Therefore, it may be possible that they will find some problems to get their desired destination and the language barrier can cause the problem to get worse. The smartphone is a key tool of our daily life and is helpful in traveling around Japan without bringing a heavy tourist guide and maps along the trip. Today I have to recommend free apps that I use every day in Japan. Apps are more helpful to make your journey easier and smoother. Before going to Japan, make sure you have apps on your mobile phone. 1) GuruNavitimeimage.png 21.93 KBJapan has many restaurants and gourmets, but which one is tailored to your needs. If you don't have a plan on where to eat and which restaurant you need to go to, GuruNavi is the best app to find the best restaurants to suit your needs and nearby. GuruNavi is a leading Japanese guide to gourmets and restaurants. The application has built a good image and reputation due to the opinions and recommendations of users of the application. It's easy to pinpoint your preferred location, price range, type of food, and then a list of top-rating restaurants will appear in the app. You can also make a reservation directly through the app and find savings opportunities. The application supports many languages, such as English, Chinese and Korean. It is available in the iOS and Android apps. Photos: Tabelog image.png 15.23 KBNajnowa usefull application to find food recommendations and restaurants called Tabelog. This is the most Japanese favorite app when you need to find the best place to eat. It is similar to gurunavi application. Tabelog helps you find restaurants nearby and sort them by price and rating. With the classification system, it's easy to make a good decision, you don't even know Japanese. The difference between GuruNavi and Tabelog is GuruNavi is the main source of information, while Tabelog focuses on reviews. Tabelog also selected the best restaurants and dishes based on the Gold, Silver and Bronze Awards 2017. For more information, check their website. In general, this is comparable to the yelp app and is available in the iOS and Android apps. Photos: MAPS. MEimage.png 35.8 KBDuring a trip to another country you've never you have not visited, you will get lost. Do you have heavy guides or maps with you while traveling? By no means. Heavy, inconvenience and wasting money. Why not choose more useful mobile apps to guide your direction. Maps. ME is an application for offline navigation. It is recommended that to search for specific destinations without an Internet connection. Don't worry, the information on the map is updated and accurate, and you won't get lost while you have a MAP. me application. Get ready to install before you travel to Japan. It is available in the iOS and Android apps. Photo: Google Mapsimage.png 15.75 KBGoogle Map is a navigation app for finding your destination by entering an address. Many foreigners living in Japan use Google Maps because it's simple and provides the shortest route to the user. In addition, it also has real-time updates such as roads under construction or train delays. Some apps support Tokyo Metro and Metro Toei, while Google Map provides train lines, subway lines, and walking paths. The difference between Maps.Me and Google Map is Google Map can not download offline maps. You can't use the app if you're not connected to the Internet. It is available in the iOS and Android apps. Photo: Tokyo Subway Navigation image.png 17.5 KBAssy Forbes 2016, Tokyo subway system is one of the most complex in the world. It's not because of the many lines, but there are many companies that have subway systems in this city. Indeed, you need to get a subway navigation app if you want to go Japan. Tokyo Subway Navigation is a free app provided by Metro Tokyo for users. Users can search for information about tokyo metro network transfers. Just select the departure station and destination station, then the app will show you the main route, cost and time required from the departure point to your destination. The app can also advise you which exits to take for popular tourist attractions. It can also be used offline or offline, therefore, don't worry if you don't have an Internet connection.
